

Dear FCC Members,

It is with all due respect that I express my thoughts as they pertain to the Global Crossing matter that presents before your Commission. This issue has everything that is bad about America connected to it. There is fraud that has involved upper Global Crossing management as well as certain large American institutions/creditors. There are also numerous conflicts of interest involving U.S. government officials with hidden agendas who are on committees/agencies that are part of the process of deciding Global Crossing's future. These same U.S. government officials and their colleagues have something to gain if the current Global Crossing/Singapore Technologies Telemedia (STT) deal is approved. In fact, this matter should be immediately referred to the United States Bankruptcy Court Southern District of New York on the premise of fraud. A deal developed under the umbrella of fraud should be nullified. All of the above comments, and a great deal more, have already been thoroughly documented by CommAxxess' CEO Karl Schwarz in multiple FCC filings.

I implore the Members of the FCC to also take the issues of U.S. National Security and the negative effect to the U.S. Economy this Global Crossing/STT deal will create. Singapore Technologies Telemedia (STT) is a company with direct ties to the Singapore government. In fact, the current Deputy Chairman of STT (Ho Ching) is married to Singapore's Deputy Prime Minister Brigadier-General Lee Hsien Loong. The Singapore government also owns a company named Temasek which has an 11.5% controlling stake in a Chinese shipping company named COSCO. It just so happens that Ho Ching is also Director of Temasek. COSCO has been involved in shady business such as transporting weapons to gangs in San Francisco. COSCO is also a direct arm of Li Ka Shing, China's wealthiest man and strong Chinese government and communist party supporter as well as owner of Hutchison Whampoa. The original Global Crossing deal involved STT and Hutchison Whampoa. The FCC must understand that approving and allowing the sale of Global Crossing to STT is essentially giving it to Li Ka Shing and thus the shifty and uncooperative Chinese. FCC Members, the connect the dots are easy to see and have already been made by many Americans. With the approval of this STT deal, sensitive information running through Global Crossing's lines will not have the ability to be completely monitored and cyber warfare can ensue. This sale has the formula to become a complete disaster. With Singapore controlling Global Crossing, in addition to the strong possibility that the company ends up in China's hands, many Global Crossing services provided to U.S. citizens and U.S. companies utilizing their services will be cost dependant on a foreign country. The same goes for U.S. companies that provide products to Global Crossing; many of which will no doubt lose their contracts. Add to this the great loss in investor confidence and the U.S. economy will be greatly affected.

Knowing the immense negative consequences this Global Crossing/STT deal would create, how could any FCC Member even consider it. To each FCC Member, could you sincerely be able to look at yourself in the mirror every morning knowing you helped make the United States less secure and unnecessarily affected millions of Americans financially. Especially when there is a higher bid from a U.S. company, CommAxxess, that would include current Global Crossing Shareholders and help restore many U.S. citizen's 401K plans. Karl Schwarz, CommAxxess' CEO, is also a man of honor and integrity. He is the perfect person to be at the helm of such an important asset as that of Global Crossing's.

In closing, what we need are "Patriots" to our great Nation, not traitors. Our Founding Fathers fought to create the ideals that represent America. We must all collectively fight to preserve these very ideals. FCC Members, the beauty is that you can make a positive difference at this point in time. Please stop this

anti-American Global Crossing/STT deal before it is too late. Thank you for your time and attention to this very important matter.

Respectfully Yours,

Dr. Peter J. Magoulas
